

I respectfully ask that you reject NAB petition 04-160 and any other type of censorship and restriction of content upon satellite radio. I pay for this service in order to get a clear and undistorted signal that is not available over the AM or FM broadcast signals. I travel many parts of the country in my job in which it is impossible to receive a conventional radio signal. Without satellite radio, I would be without news, weather, and entertainemnt in large geographical areas that I travel in.

Sincerely,

Michael Wish
